### The Doctor.

Many a man with his whole soul immersed in business and money-getting is like the miser whose spring door shut to and locked him in forever. Men work and slave and worry and get sick and broken down forgetting all the time that health is worth more than gold, and that a happy home is rather than great riches, until they hear the trap-spring to and shut them off from all the bright hopes they labored for.

A sick man cannot be happy; he cannot accomplish the work he has to do in this world, he loses the very money he is striving for, his ambition defeats itself. Any man who discovers that his strength and energy are giving way has an unfailing means of regaining his physical health and stamina in the simple yet all-powerful restorative power of that wonderful "Golden Medical Discovery" originated by Dr. R. V. Pierce, of Buffalo, N. Y., the world-famous specialist in diseases of the nutritive organs.

Among the thousands who have consulted him by mail the case of Mr. Newton B. Blake, of Tipterville, Tippah Co., Miss., as shown in the following extract, is a remarkable example of his treatment: "In December, 1897, I began to fail. I tried many different kinds of medicines and the more I took the worse the disease grew. Finally in April when I was busy at my work, my health got so bad that I could not hold out longer. My breath became short and I was weak and nervous and oftentimes would spit blood. I was unable to work. I tried one of the doctors in the vicinity but failed to obtain relief. I seemed to grow weaker every day. I received a book from Dr. Pierce in which I read a passage to me, and decided to write to Dr. Pierce. He recommended me to take his 'Golden Medical Discovery.' After taking six bottles of this remedy I can recommend it as one of the best medicines to build up the system. I am now enjoying good health."

Torpid liver and constipation are surely and speedily cured by Dr. Pierce's Pleasant Pellets. They never gripe. They regulate, tone up and invigorate the liver, stomach and bowels. No substitute urged by mercenary dealers is as good.

The Old Man's Wonderful Cure.

A good story is told among the medical men of Cleveland, a story which was started by the victim himself. He is a physician of considerable repute, and some time ago was called to attend a gentleman of advanced years who was suffering from a slight complication of disorders. The doctor went to work with a will, and presently had the patient on the road to recovery. In fact, two weeks from the time he took the case he had him cured.

As he left the house, after announcing that further visits would be unnecessary, the daughter of the restored man accompanied him to the door.

"Doctor," she said in somewhat tremulous tones, "I want to tell you"—

The doctor, who supposed she was anxious to express her gratitude for his skilled attention, waved her thanks aside.

"Don't mention it, madam," he affably said. "We always try to do our duty."

"But, doctor," she persisted, "it is something that will interest you. I feel that"—

"Say no more, madam!" cried the doctor, much moved by the woman's agitation.

"It is something I must tell you, doctor," she continued. "Please listen."

The doctor halted with his hand on the knob.

"Yesterday," said the woman, "I was down town and met Mrs. Pugsley, the Christian Scientist, and she told me she had been giving father 'absent treatments' for two weeks. Isn't it just too wonderful?"

"Good morning!" said the doctor dryly. —Cleveland Plain Dealer

### INSANITY'S DEBT TO MEDICAL SCIENCE.

Insanity is now recognized as a disease which is the result of some functional or organic disturbance of the brain or of some injury or malformation of that organ. Be it said to the everlasting credit of medical science that it has rescued the whole subject of the diseases of the brain and nervous system from the region of myth and superstition and placed it on a scientific plane along with the other diseases and injuries to which human flesh is heir.

The old lunatic asylums and the filthy cells of the county jails with all their horrors, where the victims of dethroned reason used to be confined and tortured have been abolished and in their place we now have the modern hospital for the insane, and it stands on the same footing in every respect as a hospital for diseases of the eye and ear or any other medical specialty. It was not the churches but medical science, inspired by a desire to benefit mankind, which taught the world that the insane are our brothers still and that to them is due the same Christian charity and care as to any others in distress.—Dr. John Girdner in *North American Review*.

A Bit of Ribbon.

A London paper tells this story of the final signing of the Spanish-American peace treaty: "Every diplomatic instrument bears a seal from which depends a ribbon, and when the seal was about to be affixed to the treaty the commissioners, both of Spain and America, expressed a desire, in graceful acknowledgment of the courtesy shown by France, that the dependent ribbon should be tricolored. Search was forthwith made high and low in the Quai d'Orsay, with the result that in the foreign office of the French republic not a bit of ribbon of the French colors could be found.

"At this critical juncture a brilliant inspiration flashed across one of the heads of the department. 'Go,' he said to a messenger, 'to M. X.—, the confectioner, in the Rue St. Honore, for a pound of chocolate cakes and be sure you ask him to tie them up with a tricolor ribbon.' With that bit of confectioner's ribbon the treaty of peace between Spain and the United States was sealed."

Obedience of Orders.

A naval commander in the reign of Queen Anne was ordered to cruise with a squadron within certain limits on the coast of Spain. Having received information that a Spanish fleet was in Vigo beyond his limits, he resolved to risk his personal responsibility for the good of his country. He accordingly attacked and defeated the Spanish fleet with uncommon gallantry. When he joined the admiral under whom he served, he was ordered under arrest, and was asked, if he did not know that by the articles of war he was liable to be shot for disobedience of orders.

He replied with great composure that he was very sensible that he was, but added, "The man who is afraid to risk his life in any way when the good of his country requires it is unworthy of a command in her majesty's service."

"Nuggeta."

Humor of Speech.

"Coom out o' that!" shouted an irate but zealous churchwarden in a rural district to some urchins who were playing marbles against the church door. "I'll let passon know how ye dessicate the holy place." This word forms a common stumbling block. A grocer once informed us that people from quite the respectable classes not infrequently asked him for desecrated soup.—Cornhill Magazine.
